

Integrated Financial Management System for KickStart International

 	<p>KickStart International</p> 
 	<p>Enterprise Resource Planning based on Microsoft Dynamics ERP</p> 

Objectives

KickStart used disparate financial systems across its major locations, making fund consolidation and reporting difficult. The organization was searching for a fund accounting system that could provide a common solution across its global locations in multiple currencies and languages and hence centralize the organizations data and integrate the processes for well-timed operations.

KickStart required replacing multiple financial systems used at the headquarters and an in-house developed system at its main offices with an Integrated Financial Management System.

Value Delivered

After a thorough evaluation of the solutions available in the market, KickStart International chose Techno Brain's Microsoft based ERP Solution as a perfect match for its requirement. The solution provides financial reporting, budgeting, multi-currency support and expense/approval processing along with easy access to technical support in order to improve the efficiency of the organization

Benefits:

- Eliminates delays in funds consolidations and generating MIS reports.
- Supports multi lingual and multi-currency transactions.

Centralized database system, eliminating the overhead of maintaining manual records
