

Case Study

# Integrated Financial System for Government Agencies

Better Control and Reporting Through Integrated  
Financial System

# Integrated Financial Management System for Non Profit Organizations

## Customer Profile

National Environment Management Council (NEMC) provides advice on conservation and management and mandates to undertake enforcement, compliance, review and monitoring of environmental impacts assessments, research, facilitate public participation in environmental decision-making, raise environmental awareness and collect and disseminate environmental information.

## Business Situation

With branches spread across the country, NEMC has a wide range of items and SKUs which made it hard for the management to efficiently manage the inventory. The legacy management system in place was not in match for the requirements of the company, causing encumbrance to the IT staff. The functional limitations of the legacy system restricted the NEMC management in terms of having a competitive edge as well as having a proper reporting system in place. NEMC wished to replace their legacy system and eventually deliver a powerful management reporting tool. NEMC was looking for a flexible yet powerful system which can cope up with NEMC rapid expansion and changing circumstances and could take the load of huge volume of transactions due to rapid expansion.

## Solution

Techno Brain provided its Integrated Financial, Sales & Distribution and Manufacturing Management system. The solutions enhanced NEMC's capabilities of accessing information from the headquarters and efficiently allocating the required resources to the branches spread across Africa. The solution provided NEMC with the robustness and flexibility they were looking for in their system. The solution empowered the users with better decision making capabilities by streamlining their inventory management, sales and distribution, manufacturing process and providing accurate reports, thus increasing the overall productivity of the employees and of the organization as well.

## Technologies

Microsoft Dynamics NAV 2009

## Benefits

Techno Brain's solution provided NEMC with the appropriate solution for managing their SKUs, streamlining their business process and financial transactions at each location across the country and provided the management with exact and real time reporting tool.

### The key benefits of the solution are:

- **User Friendly:** The solution allowed users across the organization to quickly gain acquaintance with the systems and easily access the information they need to perform operations more efficiently.
- **User Empowerment:** Techno Brain provided NEMC with an effective Management System which allows the authorized employee to query the system and draw their own report creating greater visibility and availability of resources.
- **Lower Total Cost of Ownership:** Techno Brain have delivered a complete solution for a lower cost of ownership through availability of local support, product quality, and the relatively low acquisition cost of the Microsoft Dynamics NAV solution.
