

Techno Brain Group is now ISO 27001:2013 (ISMS) Certified

Information Security 'Top of Mind' for Techno Brain

Techno Brain, a leading software development company with operations in Africa, Europe, India and USA, proudly announced today that it has achieved the ISO 27001:2013 Information Security Management System (ISMS) Standard for its group's shared services, design, development, support of application software, IT training and internal operations.

"We are committed to the security of all our stakeholders." says Mr. Manoj Shanker, the Chief Executive Officer at Techno Brain. "We have an obligation to our customers to maintain the highest standard for securing the information they are entrusting us with. Obtaining this accreditation validates our unrelenting adherence to best practices and processes for information security management."

Anand Mohan, Chief Operating Officer, Techno Brain, adds, "Data security is top priority for us. This achievement is an assurance of our continued compliance to the highest standards of information security management, and it reinstates our effort to remain current and relevant to this evolving landscape of information security threats."

The ISO 27001 ISMS Standards is a process approach established and updated by the International Organization for Standardization (ISO), the world's largest developer of international standards. The ISO 27001:2013 ISMS Standard specifies the requirements for establishing, implementing, maintaining, and continually improving an information security management system (ISMS) for any organization, regardless of type or size.

The achievement comes after the Company underwent a stringent evaluation of its processes for its ISMS conducted by Bureau Veritas. Established in 1828, Bureau Veritas is a global leader in Testing, Inspection and Certification (TIC), delivering high quality services to help clients meet the growing challenges of quality, safety, environmental protection and social responsibility.
